

# Amp, Straps & Cable Compare Kit

## The G# Amp

The G # Amplifier is an amp which will work equally well with either electric or acoustic/electric guitars. Very small, compact and light weight unit that can be easily transported to any venue. Comes with shoulder bag.

It has an output of 40 watts into a very effective 8" full range double cone speaker. The speaker has been specially developed for this amp.

Two channels: Channel 1 features a combo input that accepts balanced XLR as well as single ended jack, channel 2 features a standard high imp. jack input, with high or low sensitivity switch and color switch. Three-band EQ (bass, mid and treble), efx level and master level control. Send/return jacks, balanced DI output, line out, ext. speaker jack and tuner output. There is also a footswitch input for external and internal effects. Size is 10,25" x 10,25" x 9,25" (H-W-D). Weight is 12lbs (5,3 kg).

## The G# real leather straps

The G# Leather Straps are hand made from high quality leather. The brown comes embroidered and engraved. The engraved black one is made from heavier leather and comes with a 20 year warranty.

## The G# Cable Compare Kit™

The G# Cable Compare Kit™ is a revolutionary new product, and a "must have" for music stores/studios/serious technicians/musicians.

Allows instant comparison when switching between two cables. The kit consists of two switch units and a "dummy" unit with a load similar to that of an electric guitar to be used when checking for microphonic/noise properties. A relay operated kit is also available - controlled by a single footswitch.

## Applications

- \* Compare sound quality, which cable has the sound you're after
- \* Compare microphonic /shielding quality
- \* Compare transformer/flourecent noise
- \* Compare long cables against short ones of the same quality.
- \* Can also be used to switch between two guitars or effect set-ups.
